

Solar Orbiter & RPW Status

RPW Consortium meeting # 27
Prague, Villa Lanna, ASI, 2-4 October 2023

Laboratoire d'Études Spatiales et d'Instrumentation en Astrophysique

- Overall the S/C continues working well
 - *But still anomalies (and shutdowns) from time to time*
 - *Several instrument Flight Software updates have been implemented lately*
 - *HIS is off since late April due to an overcurrent condition (Chris' presentation)*
- The mission manager, Luis Sanchez, will retire early 2024.
- SO/PSP/DKIST Science workshop 8-11 April 2024 (<https://eclipse2024sa.com/>)

- RPW works nominally, except BIAS saturation (Yuri's presentation). Probably due to solar panels
- Submit a science nugget (<https://www.cosmos.esa.int/web/solar-orbiter/>)!
- Newt consortium meeting in Orléans in Feb 2024 (Matthieu is organizing)

- **Please send me your slides (pdf) for the 3 days !**
