RCS Status

L1 data processing

- LFR_CALBUT : OK for 7 modes

- THR_CALBUT : OK for 2 modes

- TDS_CALBA : OK for 6/8 modes
    Issues : tds_surv_rswf & tds_surv_tswf
        David's suggestion : PATH_VALUES = ('..') => PATH_VALUES = ('/opt/roc/data/spice_kernels')
            /opt/roc/data/spice_kernels/mk/solo_ANC_soc-pred-mk.tm
            /opt/roc/data/spice_kernels/mk/solo_ANC_soc-flown-mk.tm

        Constraint : The ROC can not make any modification inside of these files because they are changed day after day

        Solution ?

L1R data processing

BICAS & SCMCAL are waiting for L1 data processing
