

Test Case

Test Case ID	?
Requirements	CIRD-0320
Version	0.1
Test Case Description	Test the CSGSE export functionality of Faust

Created By	S. Lion
Reviewed By	X. Bonnin

Tester's Name	D. Bérard
Date Tested	

Test Case status (Pass/Fail/Not Executed)	
--	--

#	Prerequisites:
1	A running instance of MUSIC on roc-dev:8000
2	Access to Firefox/Chrome/Chromium Browser
3	
4	

#	Test Data
1	The script used to populate the database with the test scenario
2	The checksum (SHA 256) of a tested CSGSE script : c01b39c7a35ccc3b081a3e83d2c71fa9a767ebfeb45c69f08e17dfe3ef375a7b
3	
4	

Test Scenario	Verify that the user can export the CSGSE script using the web interface
----------------------	--

#	Step Details	Expected Results	Actual Results	Status
1	Navigate to Jenkins and check the associated automated test report	All tests should pass		Pass
2	Navigate to http://roc-dev/app/faust/ :8000	The Faust application should open		Fail
3	Select the scenario named 'sgse_test_scenario'	After a short time, the SGSE script should appear as a XML page		Suspended
4	Right-click on the web page and select save as to download the file	The file should appear in the computer's file system		Not executed
5	Compute the file checksum (SHA 256)	The checksum should match the given one
